- Quarterly - price per month with 12 months' notice £ 8,-

Stable operations

Safe and stable operations are something that is of utmost importance for running a professional homepage. We have chosen to protect our clients optimally by making demands on our server environment. There are 5 different and independent internet connections, 3 diesel generators, daily backup and Firewall, which help to protect the operations. Not even the nationwide power failure in 2003 had any affect on our clients!
